### Abstract

Answering suspicions requires knowing and applying skills, some of which are called scientific competencies. This article is organized in a descriptive analytical way and seeks to find scientific methods to answer the suspicions in Razavi's biography. By paying attention to the biography of the eighth Imam of the Shiites, it can be seen that these abilities are methodically divided into two categories: intellectual and narrative. According to the findings of this article, some of the methods that Imam Riḍā (as) used to respond to suspicions are:

Citing the Holy Qur'an and the Prophetic Sunnah, attention to the origins and causes of suspicion, benefit from the arguments of rationality, argument of success and patience and division, methodological development, canceling the false requirements of suspicion, citing ideas accepted by the audience, sensitization of the rational, correct explanation of skeptical concepts and ideas and taking advantage of the correct history.

**Keywords:** Doubt, Accountability, Methodology, Scientific reason, Razavi biography.
